SFFRFM PIONEERING QUALITY AND SAFETY IN FERTILIZERS AND AGRO-PRODUCTS FOR MALAWIAN FARMERS

The Smallholder Farmers Fertilizer Revolving Fund of Malawi (SFFRFM) reaffirms unwavering commitment to quality and the upliftment of the agricultural sector in Malawi as we are addressing recent reports of crop damage associated with our products.

SFFRFM has demonstrated a strong commitment to maintaining high quality standards in the supply of fertilizers and agro-products throughout the 37 years of existence. Established in 1988, SFFRFM has played a vital role in enhancing agricultural productivity for smallholder farmers in Malawi through extensive social and commercial programmes.

Our mission is to provide high-quality fertilizers and agro-products that are innovative, market responsive, cost-effective and environmentally sustainable. By focusing on the provision of high-quality fertilizers, SFFRFM ensures that farmers receive products that meet highest quality standards, which are essential for achieving optimal yields.

In light of the recent concerns, we are conducting a thorough investigation, and the matter has been submitted to the court for a formal determination. Our top priority is to ensure that farmers receive high-quality and effective agro-products that contribute to the advancement of the agricultural sector and enhance their livelihoods.

SFFRFM has cultivated a reputation for reliability and excellence. Our expertise in the fertilizer supply chain not only boosts agricultural output for farmers nationwide but also strengthens SFFRFM's status as a reputable partner in the agricultural sector.

We remain committed to establishing and operating a robust institutional framework that oversees the administration and management of the fertilizer supply program. Our commitment to quality will remain steadfast as we strive to create a more robust and resilient agricultural landscape in Malawi.
